

Story of APS ...

The venture has started as a small family business of knit apparel manufacturing in 1999 and since then has evolved into a rapidly growing conglomerate. APS Group considers itself as an end-to-end apparel solution provider, starting from sourcing the cotton and going all the way to providing material support to satisfy clients' petition which is "ready-made garments".

The company itself now functions with over 100 leaders and over 6,000 skilled workers. With a vertically integrated setup, the incorporation of advanced technology and a proficient management team, APS is emerging sturdily as one of the anterior business entities in the country. Looking ahead, APS is focusing more towards the front-end of the chain: the end customer. Besides, APS mostly focus on strategic verdict making process which has bought distinct competitive advantage that made APS diverse within the industry.

APS has blended the dedication and skills of its' workforce to accelerate the venture. These are the people with the best talents, commitments, and expertise with the blend of experience and enthusiasm. They work

CSR & Sustainability Information

Sustainability

CSR

SN

1	HER Project (Women health project)	Rain water harvesting: As a part of natural resource optimization, we are using latest technologies to hold and preserve rain water and facilitated our production houses rooftop with such technologies to reduce pressure on dependence of underground water. As we can hold around 250000 litre/day of water with our current facilities which we are using for our dyeing process.
2	WE Women by Lindex (Women empowerment project)	Dyeing water used as flash water in toilet
3	Cloud-based preventive health care service: We have facilitated for our manpower health and wellness services utilizing smart medical technologies integrated in smartphone application to monitor health regularly. CMED Health Ltd. has enabled this cloud-based preventive health care service for all staff and worker of APS GROUP. Through this service everyone will get a facility of having access to a CMED app and through CMED app can access their health record from their own account and use it while consulting doctor.	Survo motor installation in sewing machine
4		In sewing LED light installation
5		Cleaner production (Water pact program)
6		Global Sustainable process (Blue sign chemical process)
7		Redundant energy sourcing from Solar panel.
8		Condensate and cooling water recovery from boiler.
